## Company Information

Q.1. What is the Navigation to setting up company information?

Ans. Setup > Company > Company Information.

Q.2. What is the difference between a company name & legal name?

Ans. 1. company name - The name which the organization wants it to appear in on all forms except checks.

2. legal name - The name typically refers to the official, registered name of a company or entity as recognized by government authorities and legal documents.

Q.3. What is a Return email address?
Ans. The email address used to send email forms and reports from NetSuite to the organization / Client. This email can be used for various purposes, such as customer communications, marketing campaigns, or general inquiries. Setting or changing the return email address typically requires administrative access or permissions.

Q.4. What is Purge Account in company information?

Ans. Purging an account in NetSuite refers to permanently deleting an account or record from the system. Purging is a critical action. It should be used with caution because once an account is purged, it cannot be recovered, and all associated data will be lost.

Q.5. If you want to find your NetSuite account number, how do you find it?

Ans. User can find their NetSuite account ID at the beginning of the NetSuite URL. For example, if the URL is https://tstdrv2816485.app.netsuite.com/ then account ID is tstdrv2816485.

Q.6. Which two fields getting disabled (we cannot change value) after saving the company information?

Ans. Country & Currency field getting disabled after saving the company information.

Q.7. If you check the box ‘display logo internally’, what will happen?

Ans. If we check the box ‘display logo internally’ Then the logo shows on all pages of your NetSuite account next to the Oracle NetSuite logo.

Q.8. How many fields are present in the Address Sub tab? Explain each?

Ans. 1. Address: Address is the location of the organization.

2. Shipping Address: The address where products or goods are to be shipped or delivered. It is commonly associated with sales orders, purchase orders, and shipping-related transactions.

3. Return Address: The address to which items should be returned in the event of a product's return or when goods need to be sent back to the location from where they were shipped.

Q.9.How many URL we can find under the company URL sub tab? Explain each?

Ans. 1. Customer Centre Login: The Customer Center Login field displays the unique URL for the system-provided Customer Center login page to access your account.

2. NetSuite UI: This field consists of login URL for dashboard of NetSuite.

3. Suite Talk: Suite Talk is a web services integration platform provided by NetSuite. This allows users to integrate NetSuite with other applications, systems, or services using both SOAP (Simple Object Access Protocol) and REST (Representational State Transfer) web services.

4. REST lets: These are scriptable endpoints that allow users to create and deploy custom RESTful web services. These services can be used to interact with NetSuite data and perform various operations.

5. NetSuite's External Forms: This feature allows users to create custom web forms that can be embedded on external websites or shared via URLs. These forms can be used for various purposes, such as customer surveys, event registrations, and more.
